

best bets for college football

Stick around for 6 high-stakes blackjack tables, bet the banker with a pair of live baccarat games, or test your luck with an ever-spinning selection of 4 roulette wheels.

Las Atlantis - Best No Deposit Bonus Code
Bonus Description:

Punt Casino's 24/7 live chat support picks up the slack.

Slots Empire gives their hardened soldiers a \$25 free play bonus.

They offer excellent 24/7 phone and email support, but they lack a dedicated live chat feature.

While we review different gambling sites, you should check with local laws in your area before gambling online.

It's still always smart to check the ratings on Amazon products, but it's worth taking your appraisal a step further. Some product reviews on the site are misleading (to be charitable), if not outright fake, and all are worth some scrutiny to determine whether they're honest, because whether due user error, a glitch on Amazon's end, or the increasing likelihood that the reviews have been bought and paid for, Amazon reviews shouldn't be taken at face value. Mistakes happen, and sometimes reviews are accidentally linked to a different product. For example, a recent change to a Blu-ray player's metadata on Amazon's back end resulted in a crop of reviews from unrelated products showing up for the Blu-ray player for a short time, which altered its star rating until the error was fixed. Similarly, it's not uncommon for a user to accidentally leave a review for the wrong product.

Actually read the reviews: It's often easy to spot a fake review based on how it reads. If a reviewer seems to have a wildly different experience than those reflected in other reviews, making extremely positive or negative claims, it's probably untrustworthy. The same goes for if a review spends a little too much time recommending an obscure alternative, but doesn't offer a fair comparison or comment on the product the review is for in the first place. And if there's an abundance of one-star or 5-star reviews, but the text for each review is barely longer than a sentence (or even just a word or two), that's another telltale sign of fakes.

Look for "verified purchase": Reviews from users who actually bought the product will have a "verified purchase" badge next to their name. There's a good chance these are legit ratings/reviews, though it's not a certainty, given some unscrupulous sellers will offer "refunds" in exchange for 5 star reviews.

Read non-Amazon reviews: Seeking out off-site reviews, especially from professional reviewers/critics/websites that you trust, is always smart. It can help you establish a basic idea of how the product is reviewing elsewhere, and help you appraise user reviews elsewhere. However, just because a reviewer and a user come
