What makes a great sports betting app

A great sports betting app is packed with features and optimized for quick, reliable, on-the-go wagering.

Here's what we look for in a mobile betting app: User experience

Mobile sportsbook apps are developed with the user in mind.

A sportsbook app should offer a broad selection of sports and bet types while making it easy for its users to locate, preview, and submit their bets.

Look for a mobile app with two-step verification, timed logouts, and precise geolocation software.

On a side note, Hurts is now the favorite to win NFL MVP.
